The Long Road
by Rod Smith

Summary

The Long Road is a true story and is illustrated with photos. It is the story of an eighteen-year-old student, Terry Fox, who lives in Canada. He is a good runner until one day his leg hurts. He has cancer in his leg and doctors have to remove the leg to save his life. When he leaves hospital he remembers the children he got to know there. He wants to raise money to help them. He decides to raise money by doing a long run. He has a new, artificial leg. He chooses to run across the whole of Canada. You can see the road he took on the map on pages 2–3 of the Reader. He runs every day until he is strong.

The story describes his run, from pages 4–12. People give him a lot of money for children with cancer because they think he is a brave person. He becomes famous. But he gets ill again, then he dies. The run becomes an annual event and takes place every September. The first Terry Fox run after his death made $3,500,000 for cancer.
